Design in the Real World – Logos

Companies and other organisations rely on logos to convey information and create brand recognition. Their design is critical – time, creativity, expertise and often, vast sums of money, are invested into their creation – but what are the principles and elements of excellent logo design?

2015 | 18 min

Sports Injury Prevention and Assessment

This programme provides a comprehensive guide to the issue of sports injury; its prevention where possible and successful treatment when prevention fails

2005 | 28 min

Textiles: Mass Production

Showing the very latest industrial techniques from around the world, this resource gives pupils a fantastic insight into textile manufacturing processes.

2004 | 27 min

Textiles: Environmental Impacts

This resource explores the environmental impact of textile production in Bangladesh, and shows how the true cost of cheap textiles is being felt by the very poorest living downstream from polluting textile factories.

All About Textiles Series

Introducing Textiles

This programme introduces students to fibres, fabrics and textiles. A brief historical overview is followed by a look at various processes and also the most recent developments.

2003 | 23 min

Nutrition and Hydration in Sport

The meticulous nature of a high-performance diet is highlighted throughout the programme, illustrating just how far sports science has come and the constant demands the next generation of athletes will face.

2012 | 20 min

Popular titles included in this collection

Design: All About Textiles

In this programme we examine the properties of natural fibres such as cotton, flax, jute, sisal and bamboo; synthetic fibres such as nylon, polyester, rayon, acrylic and microfibres, and animal fibres such as wool and silk. We also look at fabric construction and surface designs.

2010 | 28 min

Voice and Body Exercises

A group of actors demonstrate a series of voice and body exercises that unite a series of moving, breathing and sounding actions in an integrated full-bodied acting workout. These smart exercises do more than simply build essential skills in alignment, movement, respiration, resonance and range, but simultaneously prepare the actor for the expression of the body's richest and most powerful thoughts and feelings

2014 | 70 min

Sports Psychology - Motivation, Anxiety and Arousal

This rich, insightful programme includes a range of interviews with Olympic athletes, coaches and sports psychologists.

2012 | 22 min

Lighting, Composition and Shooting

Understanding the effect of different lighting conditions on a subject and knowing how to compose a balanced image are key skills for any photographer. This programme explores how lighting, composition and shooting techniques are combined to create the final image.

2015 | 12 min

Design: The Elements

This interesting film presents a basic overview of the elements of design including line - vertical, horizontal, diagonal and curved; shape - symmetrical and asymmetrical; texture - smooth, reflective, rough, matte; and colour - hue, value and chroma.

2010 | 21 min

Testing Textiles: Tests Fabrics and Products Undergo

This programme looks at the different tests fabrics and products have to undergo before they hit the shelves.

2005 | 34 min

Additional resources such as student activities and support notes to assist teachers included.
